SENIOR FRONTEND SOFTWARE ENGINEER | DESIGN TECHNOLOGIST

Senior Frontend Software Engineer with 15+ years of experience building and maintaining production user interfaces for ecommerce, SaaS, and client-facing web platforms. Specialized in Vue.js, TypeScript, component architecture, design systems, and accessibility. Built checkout applications for a multi-resort platform generating \$500M+ in annual revenue and architected a multi-tenant theming solution that reduced site configuration time by 80%. Established frontend standards and testing practices, mentored junior engineers, and contributed to a 25% reduction in production UI bugs. Experienced in translating product and operational requirements into reliable, reusable, and accessible web experiences.

- Frontend Architecture
- UI Development
- Design Systems
- Automated Testing
- API Integration
- Web Accessibility
- Responsive Design
- Agile Development
- Project Management

EDUCATION | CERTIFICATION

Bachelor of Fine Arts (B.F.A.) | New Media: Design & Imaging | Rochester Institute of Technology | 2011
Associate of Arts (A.A.) | Graphic Design | Monroe Community College | 2008

TECHNICAL COMPETENCIES

Languages & Web Technologies: JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS

Frontend Frameworks: Vue.js (Vue 2 & 3), Composition API, Options API, Vuetify

State Management: Pinia, Vuex

Architecture & Integration: Single-Page Applications, Component-Based Architecture, REST APIs, Vue Router, Leaflet

Testing: Vitest, Playwright, Unit Testing, End-to-End Testing

Development & Deployment: Vite, Webpack, Git, CI/CD Pipelines, AI Spec Driven Development

Accessibility & Design: a11y, WCAG Compliance, Responsive Design, Figma, Adobe Creative Cloud

Project Tools: Jira, Cursor, Claude Code

PROFESSIONAL EXPERIENCE

Aspenware | Remote
Senior Front-End Engineer

2020 – 2026

Developed and tested production user interfaces for a multi-resort ecommerce platform, collaborating with product and operations teams on guest-facing reliability and payment workflows.

- Built Vue.js checkout single-page applications in TypeScript for a multi-resort platform supporting \$500M+ in annual revenue.
- Designed and architected a multi-tenant theming platform that moved site configuration from engineering to customer service and reduced setup time by 80%.

- Developed a11y and WCAG compliant user interfaces with unit and end-to-end coverage to support the reliability and accessibility of guest-facing experiences and payment flows.
- Migrated e-commerce legacy Vue 2 options API architecture to Vue 3 composition API to improve performance and implement native TypeScript support for bug reduction and prevention of end of life security gaps.
- Reduced feature delivery times by up to 20% via Spec Drive Development (AI) workflows.

Parkifi | Denver, CO
Software Engineer II

2018 – 2020

Developed production user interfaces and operations dashboards for an embedded parking platform while establishing frontend development and testing standards.

- Developed real-time operations dashboards visualizing embedded sensor status and lot locations with Leaflet, which improved system visibility and technician response times.
- Established frontend standards and testing practices, mentored junior engineers, and reduced production UI bugs by 25%.
- Engineered a vector based mapping solution that provided operators with a lot occupancy view from embedded sensor data; results provided instantaneous violation response and rapid occupancy management capabilities.

Clean Energy Collective | Denver, CO
Front End Developer

2015 – 2018

Developed and maintained corporate and digital marketing web applications while coordinating technical delivery between marketing and information technology teams.

- Re-engineered the corporate website as a Vue.js single-page application, migrating from legacy marketing platforms without disrupting the public site.
- Managed all company digital marketing web applications, from layout and user experience through development and release which streamlined the launch process and boosted user engagement.
- Served as technical lead between marketing and IT, managing a shared Jira queue to coordinate campaign and engineering deliverables.

Practis Inc | Charlotte, NC
Web Designer / Developer / Project Manager

2011 – 2015

Directed the design, development, and delivery of concurrent client websites while collaborating with clients and stakeholders throughout the project lifecycle.

- Directed end-to-end delivery of 5+ concurrent client websites on average as designer, developer, and project manager, completing all projects on schedule.
- Designed and built responsive web interfaces using a shared visual system, allowing new clients to reuse established design patterns instead of one-off pages, reducing site standup times by up to 70%.
- Partnered with clients and stakeholders to deliver healthcare websites that received multiple design awards.
- Developed interactive web tools to explain complex medical topics to patients improving informed consent.
