Agile, Agentic Engineering Workflows, SDLC, a11y, WCAG SEO, Compliance and Audits, Responsive UIs, Accessibility, Interface & User Experience Design (Figma, Adobe CC), Cross-functional alignment, Fostering professional growth, JIRA Defects, Regression

EXPERIENCE

Aspenware | Senior Front End Developer | Aug 2020 - Aug 2026

- Spearheaded a multi-gateway checkout flow used across dozens of ski resorts, supporting \$500M+ in annual guest payments during peak-season traffic.
- Architected and designed an in-browser multi-tenant theming platform that moved site setup from engineering to customer service and cut configuration time by 80%.
- Raised unit and E2E coverage by 60% on a guest-facing UI by shipping testable Vue 3 components with Vitest and Playwright.

Parkifi | Software Engineer II | Jun 2018 - Aug 2020

- Developed real-time operations dashboards visualizing parking occupancy and location, reducing operator response time by 25% through REST APIs and Leaflet.
 - Owned and enhanced the production UI for an embedded parking product's SPA, increasing dashboard adoption by 30% among operators.
 - Established frontend development standards and mentored 3 junior engineers, improving code quality and consistency.
-

Clean Energy Collective | Front End Developer | Sep 2015 - Jun 2018

- Rebuilt the public marketing site as a responsive Vue SPA, replacing legacy platforms with no downtime on the live site.
 - Developed and maintained all company marketing web apps, handling layout, UX design, and releases with HTML5, Vuetify, and SEO/GA4, which streamlined the launch process and boosted user engagement.
 - Ran a shared Jira queue so marketing campaigns and IT work shipped on one backlog.
-

Practis Inc | Web Designer / Developer / Project Manager | Aug 2011 - Sep 2015

- Directed 5+ concurrent client sites as a UX designer, developer, and project manager, with a 100% on-time delivery record.
 - Designed a shared theming system with brand customizability so new healthcare clients were onboarded on a common platform instead of one-off pages, cutting site stand-up time by up to 70%.
 - Shipped healthcare sites on WordPress that won the 2014 WebAward Standard of Excellence and an eHealthcare Leadership Award for Best Overall Site
-
